

Knights Ferry

Emily Perez

Introduction and Methods: Site Information

<u>Dates of Site Visit</u>	February 22, March 16, April 18, May 9
<u>Ecoregion</u>	Great Valley
<u>Elevation (m)</u>	64.6
<u>Latitude and Longitude</u>	37.81965, -120.67215
<u>Annual precipitation (inches / mm)</u>	19 inches / 482.6 mm

Observations: Seasonal Changes

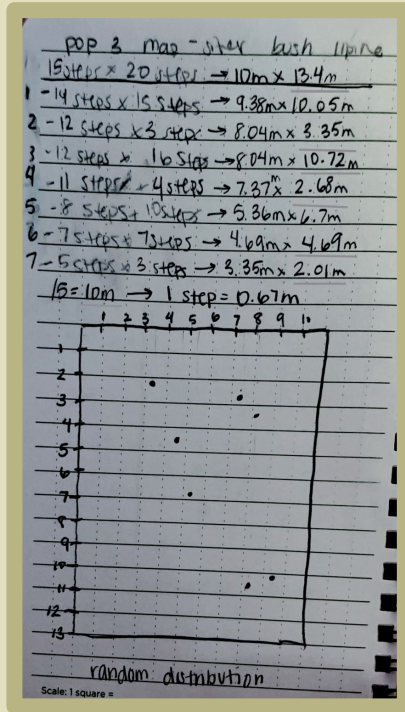

Here are a few seasonal changes between my first site visit and my last site visit:

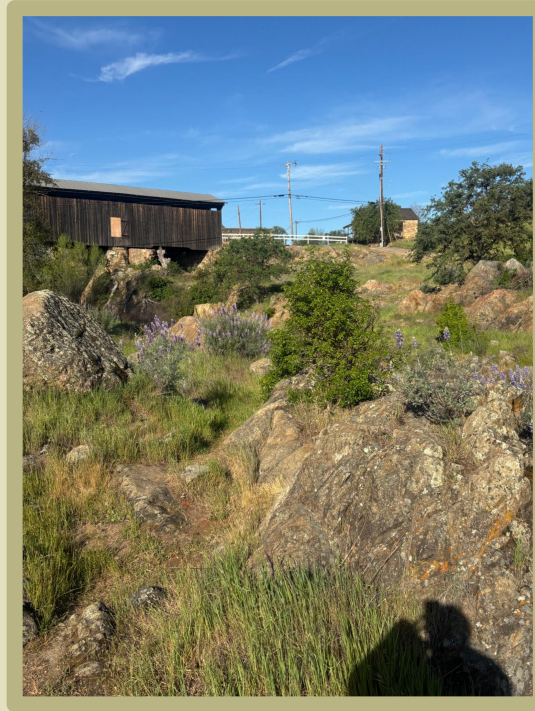

- ★ The water level is higher during my first site visit
- ★ There is more vegetation and greenery during my last site visit
- ★ The current of the river was a lot more still during my last visit
- ★ Plants were more easily identifiable

Observations: Population and Community Studies

Population of Silver Bush Lupine
Distribution: Random/ Clumped

Survey area: 10m x 13.4m
Density: 0.052

Drought-tolerant shrub native
to western North America.
Thrives in dry, sunny, and rocky
environments.

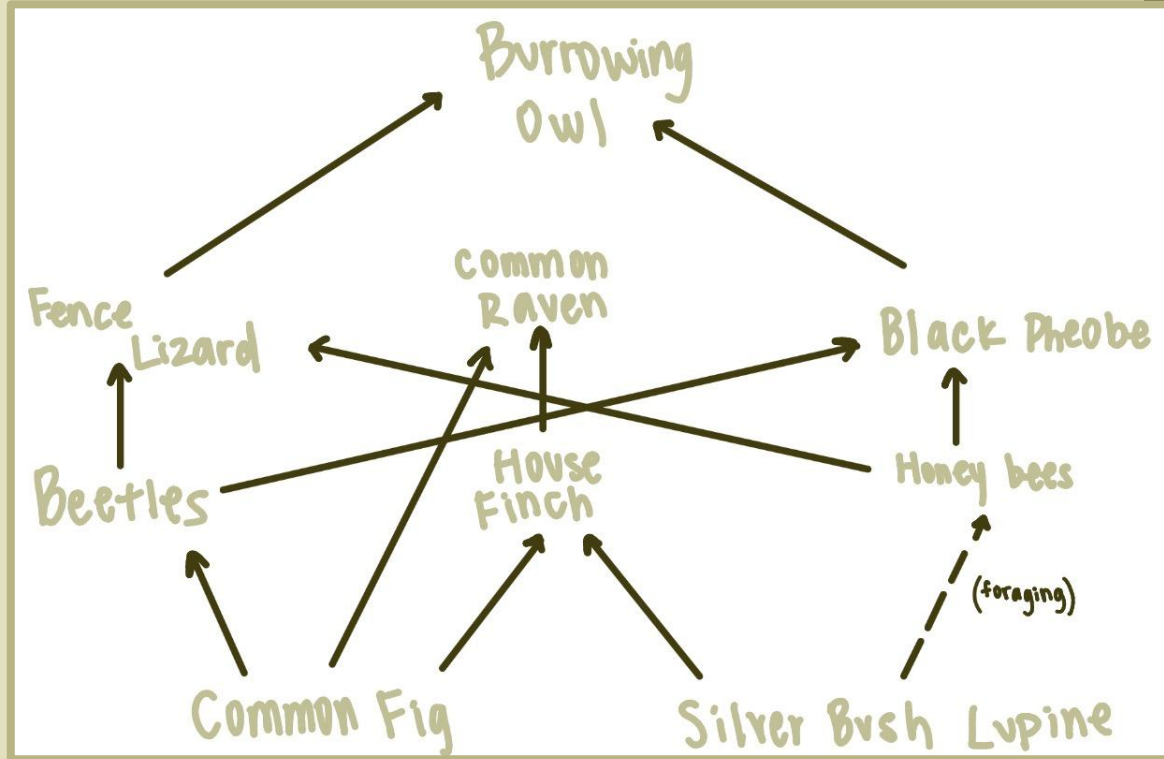

Your Experience as an Ecologist

Taxa Richness: 56

<u>Birds</u>	30: Turkey Vultures, Black Phoebe, Raven, etc.
<u>Mammals</u>	0
<u>Trees/ Plants</u>	13: Fig, Dandelion, Mustard, Lupine, Stork's Bill, etc.
<u>Lichen</u>	2: Orange lichen, Yellow-green lichen
<u>Reptiles</u>	2: Snake, Lizard
<u>Insects</u>	9: Bees, butterflies, ants, beetles, crickets, gnats, etc.

Results and Interpretation

What did you learn?

I learned a lot over the last 4 site visits. I learned how to be more attentive to my surroundings. I also learned how to apply ecological concepts we learned during lecture in real life.

What was the field experience like?

The field experience was interesting. It was totally new to me. I was nervous the first time, but after showing up multiple times, I was a lot more comfortable walking around and writing in my yellow notebook.

What was most memorable?

I believe the most memorable part of this whole experience was doing this with my friend and her family. It was either her mom or dad that would take us, it was nice to see them enjoying this as much as we did. They would even help us look for different species and take pictures.

What was new and different?

I am personally not an outside person. I rather stay inside and do other hobbies, so this whole experience was new and different. It was interesting to experience nature in a different light.

What would you like to continue studying?

I would like to continue to study the migratory pattern of the bird around us. It was interesting to see how the Turkey Vultures occupied the whole sky the first two visits and then seeing almost none during the last two visits.

Thank you!
